Work Experience

Digital Operations Specialist, Moore Hearing Clinic, 1317 N Court St, Ottumwa, IA, 2015 – Present

- Established, maintained, and updated the company website, enhancing the clinic's online presence by doubling website traffic.
- Managed the clinic's social media platforms, successfully increasing engagement through targeted content strategies.
- Oversaw insurance filings for over 150 patients annually, streamlining the process.
- Designed and implemented new customer information and audiology forms, improving the data collection process.
- Initiated and grew a mailing list from scratch to over 200 active subscribers, enhancing communication and engagement with clients.
- Developed a Python program to automate insurance calculations, reducing processing time by 50% and minimizing errors.

Project

Recipe Realm is a user-friendly platform that enables users to share, rate and discover delightful recipes:

- Developed using Python, Flask, HTML, CSS, Heroku, SQLite offering users a centralized platform.
- Introduced a robust Bootstrap-based UI, ensuring responsiveness across devices.
- Implemented a secure authentication system with password hashing, ensuring data protection.
- Incorporated dynamic rating system allowing users to rate and see average ratings.
